WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/KR2004/001880

| Box No. I Basis of this opinion |
|--|
| |
| 1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item. |
| This opinion has been established on the basis of a translation from the original language into the following language, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)). |
| 2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: |
| a. type of material |
| a sequence listing table(s) related to the sequence listing |
| b. format of material |
| in wirtten format |
| in computer readable form |
| c. time of filing/furnishing |
| contained in the international application as filed. |
| filed together with the international application in computer readable form. |
| furnished subsequently to this Authority for the purposes of search. |
| 3. In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished. |
| 4. Additional comments: |

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/KR2004/001880

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

| Novelty (N) | Claims 1 - 3 | YES |
|-------------------------------|--------------|-----|
| | Claims NONE | NO |
| Inventive step (IS) | Claims 2, 3 | YES |
| | Claims 1 | NO |
| Industrial applicability (IA) | Claims 1-3 | YES |
| | Claims NONE | NO |

2. Citations and explanations:

Reference is made to the following document:

D: US 6584315 B1 (24 June 2003)

D, which is considered to represent the closest prior art to the invention of claim 1, discloses a method of allocating a frame offset and a link in a base station, comprising the steps of: checking a link state; determining whether the link is being used or not; analyzing the method of allocating a communication channel; and selecting a link having less users (D, column 2, line 55 to column 3, line 11). The difference between claim 1 and D is the structure of the link database. However, it is obvious to a skilled person in the art that the items of the link database are necessary information to implement the method of D1. Therefore, claim 1 lacks an inventive step.
